

Slab work for Seepz Metro stn complete

Mumbai: Mumbai Metro Rail Corporation (MMRC), which is executing the underground Metro 3 corridor, has completed construction of all the slabs at Seepz station.

With this, MMRC has completed "Package 7" of the construction of slabs at three stations—Marol Naka, MIDC and now Seepz.

An MMRC spokesperson said, "The construction work includes all four slabs for the base, the concourse, the mezzanine and the roof."

MMRC director (projects) SK Gupta said, "Heavy traffic activity in the area posed enough challenges before us. Once the corridor is operational, the station will provide north-south, east-west connectivity to Mumbaiers." —**Manthan K Mehta**
